

Differences between the DP-600 and DP-700 exams

Microsoft Fabric

**Kevin Chant &
Pragati Jain**

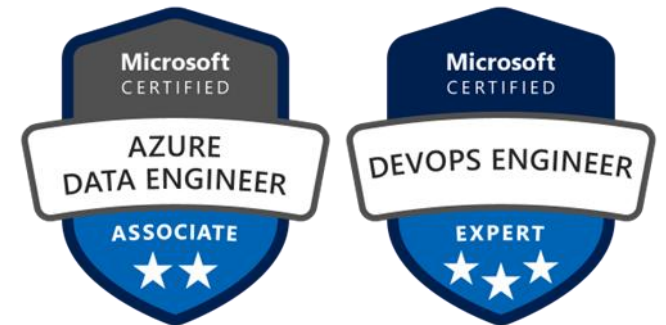

Agenda

- Super-Fast Bios
- About the DP-600 changes
- What the DP-700 entails
- Visual differences
- Advice

Pragati Jain

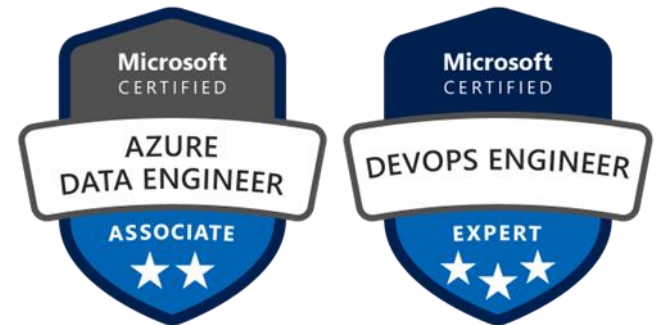

- Analytics Manager in the UK
 - Data Platform MVP
 - Microsoft Fabric Superuser
 - Event organizer & UG Leader
 - New mum

About the DP-600 exam

- Focuses on Fabric Analytics Engineer role
- Aimed at Fabric Analytics Engineer role
- Skills measured changes on Nov 15th
- Now focuses more on semantic models than Data Engineering aspects

Five fresh facts about the DP-600

- Will not be replaced by DP-700 exam
- Exposure to multiple workloads still required
- KQL knowledge now required.
- Power BI professionals still need to know other skillsets
- Data Engineers still need deep Power BI knowledge

What has been removed

- Plan a data analytics environment
- Create objects in a lakehouse or warehouse
- Explore and analyze data
- References to DAX Studio and Tabular Editor

Detailed listing of analytics development lifecycle changes

- “Configure version control” now “implement version control”
- “Plan and implement deployment solutions” now “create and configure deployment pipelines”
- Umm, that’s it

About the DP-700 exam

- Aimed at Data Engineers
- Currently in beta
- Knowledge about T-SQL, PySpark and KQL required
- In other words; Data Warehouse, Lakehouse and Real-Time intelligence
- Monitoring and performance tuning for all three also required

What are the differences

- Aimed for two different roles:
 - DP-600 for Analytics Engineers
 - DP-700 for more traditional Data Engineer role
- Knowledge about different workloads required
- Heatmaps

Advice for both exams

Go relevant study guide

Take advantage of the Fabric trial license.

Book the exam when **you** are ready.

Keep an eye out for any name or GUI changes.

Make most of online resources.

Attend relevant events and training days.
